GitHub | **LinkedIn** | **LeetCode** | **HackerRank**

Education

University of Petroleum and Energy Studies (UPES) — Dehradun, India
Bachelor of Technology in Computer Science and Engineering — July 2020 - July 2024
CGPA: 8.56

Experience

Urumi (UrumiAI) | DevOps Engineer — Bengaluru, IN | Jun 2026 - Present

- **Led 3 production e-commerce migrations (2 UK, 1 US) off managed enterprise hosts onto multi-tenant GKE** (largest tenant ∼**150GB MariaDB**); engineered the DB path on **GCP Database Migration Service** as a **staged CDC chain** (source MariaDB → MySQL 5.7 bridge → Cloud SQL MySQL 8.0 → 8.4), **cutting over at zero replication lag**.
- **Architected and delivered an AI-native e-commerce platform (EmDash) end-to-end on AWS from scratch** (POC to production), provisioning **8+ AWS services** (EKS, ECR, RDS, S3, IAM/IRSA, ALB, VPC, ACM) as **Terraform IaC** with a **multi-tenant Helm provisioner** for per-tenant stores, plus a **dual-cloud (AWS→GCP)** integration with existing GCP services (dashboard, GitHub CI, MCP gateway).
- Built a **production observability stack** (Grafana, Google Managed Prometheus, **SigNoz** logging/traces) across **2 GKE regions** wired into **PagerDuty**; drove **FinOps** via node-pool optimization (nodes balanced to client request load) and Cloud SQL configuration tuning, cutting **cloud spend ∼15%/month**.

Careers360 | DevOps Engineer — Gurugram, IN | Sep 2024 - May 2026

- Led infrastructure scaling for the **UP Board Results** event (the org's highest-ever traffic surge), handling **5 lakh+ requests in 30 min** and **1.5 lakh+ in 5 min** with real-time monitoring, high availability, and **zero downtime**.
- Architected and implemented the **Devtron CI/CD platform from scratch** for build and deployment across staging/beta/prod, managing full EKS cluster operations through the Devtron interface.
- Executed **zero-downtime EKS cluster upgrades (1.24 → 1.28 → 1.30 → 1.31)** across all environments, and migrated **30% of legacy applications** from traditional servers to Amazon EKS for better scalability and fault tolerance.
- Drove **FinOps** cost reductions of **25%** in the primary production account and **65%** in the secondary staging account through strategic resource optimization.
- Led the **CloudFront → Akamai** CDN migration, cutting latency **30%** for global content delivery, and consolidated 2 load balancers into 1 (**40% lower infra complexity**).
- Managed end-to-end releases across staging/beta/prod with **zero disruptions**, and replaced env-based access/secret keys with an **RBAC** model, improving security and compliance.
- Operated **Kafka** consumers and event-driven workflows for reliable message processing, and implemented centralized monitoring/logging with the **ELK** stack to improve reliability and incident response.

Careers360 | DevOps Engineer Intern — Gurugram, IN | Mar 2024 - Aug 2024

- Managed and optimized cloud infrastructure with a suite of AWS services (EC2, RDS, CloudWatch, Route53, CloudFront, VPC), automated build/deploy via Devtron and Jenkins cron jobs, and migrated **CloudWatch** metrics/logs to **Grafana**, reducing **monthly cost by 70%**.

Visvesvaraya National Institute of Technology | Summer Intern — Nagpur, IN | Jun 2023 - Jul 2023

- Built a smart irrigation system using **sensor data and ML algorithms** to optimize watering decisions, analyzing **18M data points** to automate agricultural practices and improve water-usage efficiency.

Skills

Cloud Platforms: Amazon Web Services (AWS), GCP
Container Orchestration: Kubernetes, Amazon EKS, Docker, Helm Charts, Ingress, Autoscaling
IaC & Automation: Terraform, Infrastructure Automation, CI/CD Pipeline Automation
CI/CD & GitOps: Jenkins, GitHub Actions, Devtron, Argo CD, GitOps Workflows
Monitoring & Observability: Grafana, Prometheus, CloudWatch, Alertmanager, ELK
Scripting & Programming: Python, Bash, Shell Scripting
Databases & Data Stores: Amazon RDS, Amazon DocumentDB, Amazon OpenSearch
Linux & System Administration: Linux, Process Management, System Debugging, Performance Monitoring
CDN & Networking: Akamai, Amazon CloudFront, DNS, Load Balancing, VPC Networking
Version Control: GitHub, GitLab

Projects / Open-Source

QuillPost: A Microservice-Based Blog Posting App | *Django REST, Python, React, MySQL, K8s*

- Built scalable microservices (Django auth/comments, Spring Boot posting, React frontend via REST APIs), containerized with Docker and orchestrated on Kubernetes for scalability.

Cloud Provider Advisor | *AWS, GCP, Azure, Django, Python, JS*

- Developed a multi-cloud VM comparison platform using cloud SDKs to aggregate VM data, with a UI to search, filter, and compare VMs by memory, storage, and pricing.

Parking Spot Assigner with License Plate Detector | *Python, YOLOv7, Tesseract OCR, OpenCV, MySQL*

- Engineered a computer-vision system (YOLOv7 + OCR) for automated license-plate recognition, integrated with an employee database for proximity-optimized parking allocation.

Certifications

- **Microsoft Certified: Azure Fundamentals**
- **AWS Cloud Practitioner Essentials**
